19/18 Nghĩa Phát, Phường Tân Hòa,Quận Tân Bình, TP Hồ Chí Minh

OBJECTIVE

A fresh graduate in Software Engineering with hands-on experience in real-world fullstack development during internship. Seeking a fullstack developerposition to apply my skills in Node.js,React, and MySQL. I am passionate about building clean, scalable RESTful APIs and responsive user interfaces, and I aim to contribute to a professional development team while continuously improving my problem-solving, collaboration, and coding skills

WORK EXPERIENCE

CONG VIET SERVICE TRADING COMPANY LIMIDTED

28/4/2025 - 21/6/2025

Backend Intern – VietnamIsAwesome Project

Number of participants : 6 Technologies used: Node.js, Express.js, Sequelize,MySQL.
A member of a backend team to develop RESTful APIs for a web application.Writing logic for website functions. Built API endpoints such as getUserById and getAllUsers

Build a medical appointment booking website

20/07/2025 - 25/10/2025

FULL-STACK

- Number of participants : 1
-Technologies Used:
  - **Backend:** Node.js, Express.js, MySQL, Sequelize ORM
  - **Frontend:** React.js, Redux
- Build an website online medical appointment scheduling system is designed for two main subsystems. On the administrator side, the website provides a comprehensive set of tools to manage all operations. Admins can add, delete, edit doctor information, manage the list of specialties and medical facilities. At the same time, they can manage users and directly manipulate all appointments. An important feature is that the system will automatically send a confirmation email to customers immediately after the appointment is successfully set up. On the customer side, the interface is optimized for the user, allowing them to easily search and view detailed information about doctors, scientists and clinics before proceeding to schedule treatment quickly and conveniently. User interface design using React js. Use Mysql to store data

User management application (Self-study)

15/04/2025 - 20/07/2025

FULL-STACK

- Number of participants : 1
-Technologies Used:
  - **Backend:** Node.js, Express.js, MySQL, Sequelize ORM
  - **Frontend:** React.js, Redux
- Build a user management system on a web platform. Build a RESTFUL API with ExpressJS. Use React js to build the application interface. Use JWT to send communication tokens between Frontend and Backend when making a Request. Build Middleware to authenticate users. Design and manager with MySQL.

Build a rubik's trading website

15/01/2025 - 20/03/2025

FULL-STACK

- Number of participants : 2
-Technologies Used:
  - **Backend:** Node.js, Express.js, MySQL
  - **Frontend:** React.js
- Building a Rubik's trading website system on the web platform. Built RESTful APIs with ExpressJS Designed and managed the using MySQL

SKILLS

Backend Development:

- Experienced in developing applications using ExpressJS (Node.js.

Frontend Development:

- Experienced in developing applications using HTML, CSS, ReactJS, Thymeleaf

Database Management:

- Knowledgeable in working with MySQL.

RESTful API :

- Capable of designing and implementing basic RESTful APIs.

Programming Languages:

- Familiar with JavaScript(Node js, React Js), HTML,CSS, SQL.

Technologies & Tools:

- Git, GitHub, Postman, Swagger, Jira
- VS Code, MySQL Workbench

Soft Skills:

- Strong presentation skills, able to convey ideas clearly and con dently.
- Critical thinking and problem-solving abilities to analyze and improve assignments and projects.
- Active participation in discussions, providing constructive feedback and insights.

EDUCATION

2022 - 2025

SOFTWARE ENGINEERING

Gia Định University – Bachelor of Software Engineering Ho Chi Minh City, Vietnam

Completed coursework – Pending Graduation (Expected: October 2025)
Notable course: Backend Programming (ExpressJS), Database
Manager Systems, Data Structures and Algorithms
